

# Why Choose Nordson?

PureFlow™ Hoses with RediFlex™ II Mounts

**Nordson BLUE, now available in SILVER™**

Feature	Why is this Important?	Nordson PureFlow Hose	Competitor Hose
Reduced material degradation	Degradation can take the form of discoloration, change in odor, char formation, and change in viscosity and flow behavior. These changes can lead to poor adhesive application and product performance—even unplanned downtime.	Drastically reduces curing, charring, discoloration and odor related to degradation	See results below
Longer useful life	Adhesive degradation may lead to frequent hose replacements due to material buildup in the interior of the hose	Can double the life of an average hose in situations where degradation drives replacement*	Not applicable
Easy snap-on installation	Enable flexible hose hanging, routing, pairing and keep hoses off of floors	Uses the RediFlex II mounting system	No feature

## Hours in Hose at 350° F Setpoint\*

*To create these samples, each hose was filled with the same adhesive, then capped off and held at a consistent temperature. At the indicated times, the hose was uncapped, an adhesive sample was removed (shown), and the hose was recapped.*

\*Actual results may vary
