Final Date for
Critical Service Parts:
Contact Nordson Today!

Call Nordson before April 29, 2011.

Don't risk production downtime !

In January 2006, Nordson announced a 5-year date for Series 2300 obsolescence. It's been a great run! All equipment should last this long. After over 25 years, Nordson will stop producing critical service parts for Series 2300 melters on April 29, 2011.

Option 1: Stock up on parts

Don't get caught unprepared. Contact your Nordson representative to order the parts you need and use most often. Nordson can track your parts use history to help keep your lines up and productive. Toll-free (800) 234-0506 or [Click here to find my Nordson rep.](#)

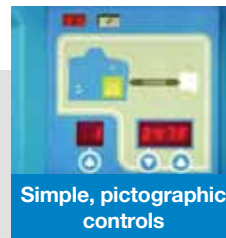

We offer trade-in programs; capital-friendly financing or leasing; monthly fee programs; adhesive bundling solutions and standard purchase options.

Option 2: Get a great deal when you trade-in and upgrade

Nordson ProBlue® melters give you the latest technology, plus simplicity of your old Series 2300

- Compatibility with your current hoses, guns, pattern controls
- Plug-and-play changeover for minimal downtime
- Piston pump, compact size,
- Simple, pictographic controls, quick disconnects
- Improved safety, less maintenance, better energy efficiency
- Available with automatic adhesive filling
