

Solutions for Speaker Assembly

How to improve speaker quality, speed up throughput and get even fewer rejects

Nordson EFD Dispense Valve Systems for precise deposit control are engineered for the most demanding production environments. EFD low maintenance dispense valves provide consistent and drip-free dispensing of low to high viscosity fluids.

For complete process control, incorporate EFD ValveMate controllers and tank reservoirs. ValveMate controllers provide a fast, convenient way to adjust valve open time while EFD tank reservoirs maintain steady fluid pressure and prevent fluid contamination and evaporation.

Expert technical assistance and high quality standards ensure productive, trouble-free performance in speaker assembly applications.

Precise cyanoacrylate deposits with EFD systems

Solutions for Speaker Assembly

Precise fluid deposits with PicoDot Jet Valve Dispensing

Bonding coil to membrane in cell phone micro speakers.

Precise fluid deposits with Performus™ hand-held dispensing systems

A digital timer and general-purpose air pressure regulator make Performus benchtop dispensers a good choice for processes that require a timed shot. The timer can be bypassed when making beads or operator-controlled fluid deposits

Precise fluid deposits with EFD dispense valve systems

Engineered for the most demanding mechanical and environmental applications, EFD low-maintenance dispense valves provide consistent and drip-free dispensing of low- to high viscosity fluids. ValveMate™ controllers provide a fast, convenient way to adjust valve open time while tank reservoirs maintain steady fluid pressure, prevent fluid contamination and evaporation.

Cyanoacrylate
White Glue
Ferrofluids
Primers
Adhesives
Epoxies
UV-cures
Sealants

Voice Coils
Surrounds
Magnet Assemblies
Spiders
Speaker Cones
Dust Caps
